

32nd International Colloquium Plastics Technology

The industry trade show: the stage for innovation, recruiting and networking

- Parallel to the IKV Colloquium – largest industry meeting for plastics technology
- Trends, developments and challenges
- Application-oriented research meets industrial development and innovation
- Intensive exchange with experts and decision makers

15 NATIONS
For more than 30 years, the IKV Colloquium has been an international event with simultaneous interpreting of the programme for trade visitors from abroad.

60 EXHIBITION STANDS
The industry trade show is an integral part of the IKV Colloquium. It brings together a wide variety of exhibitors from the plastics industry at the Eurogress in Aachen.

800 PARTICIPANTS
An industry magnet with a long tradition: Get in touch with experts and professionals in plastics technology.

The industry trade show represents the entire value chain of plastics technology:

Plant and machinery manufacturers, converters, raw material suppliers, manufacturers of laboratory and testing equipment, consulting services for the plastics industry.

Your benefits: Show your products and convince visitors with innovation.

Exchange ideas and present solutions.

Benefit from lasting contacts.

32nd International Colloquium Plastics Technology

Be part of it.

For the 32nd time, the International Colloquium Plastics Technology will open its doors on 28 and 29 February 2024 in the science city of Aachen. 800 experts from plastics technology will be part of this, the largest international meeting place for the plastics industry in Germany, to discuss innovations in research and industry.

4 plenary lectures, 15 sessions, 45 scientific papers, and a number of live presentations. That is how the IKV Colloquium will act as a stimulus for new production processes, material and process simulation, circular economy and recycling, digitalisation and lightweight technologies.

Registration >>

“The high level of expertise of the speakers and visitors in Aachen are an excellent basis for us to raise awareness of the advantages of “optical sorting”. Avoiding waste of raw materials as well as energy and personnel costs due to defects in raw materials will no doubt also be important topics at future IKV colloquia.”

*Hilger Groß, Head of Sales
SORTCO GmbH*

“The industry trade show gives us the opportunity to make contacts and present our new technologies to a broad professional audience. Furthermore, it is a good opportunity to meet many IKV alumni again. We have already been able to generate some new projects from the many discussions.”

*Dr.-Ing. Rainer Peters, Branch Manager
aiXtrusion GmbH*

“For years, the Colloquium and our stand at the industry trade show have provided us with an excellent forum to discuss our contribution to the transformation to a Circular Economy with knowledgeable experts.”

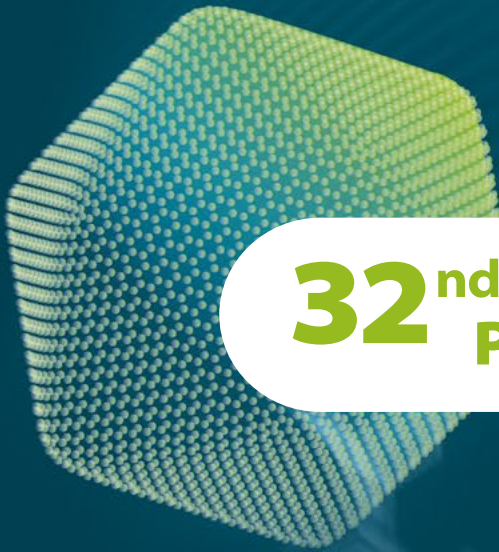

*Wolfgang Pelzer, Managing Director
M.TEC ENGINEERING GmbH*

“My professional journey began 40 years ago at IKV in Aachen and the IKV Colloquium has always offered the latest technologies, innovative trends and exciting discourses. This event offers every new generation the ideal forum to experience plastics technology in maximum diversity, to explore developments and to grow in the face of challenges. I don't want to miss a single year or contact. I hope that new generations will experience this in a similar way.”

*Wolfgang Imping, Managing Director
BB Engineering GmbH*

“Our company has been an exhibitor at the IKV Colloquium for 25 years and will continue to be keen to attend, as the event is the most important and of the highest quality for us in Europe. Networking with so many decision-makers at one event cannot be found anywhere else.”

*Ing. Ulrich Stieler, Managing Director
Stieler Kunststoff Service GmbH*

32nd International Colloquium Plastics Technology

XS, S, M, L – book the stand size that suits you:

PACKAGE XS: 6 m² stand area + 1 Colloquium ticket + company entry in IKV event app + presentation of your company on IKV website

2.100 EUR (without set up)
2.755 EUR (with set up)
